

## AMENDMENTS OF THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

### Listing of Claims:

1. (withdrawn) A method for presenting a wagering interface for interactive wagering comprising:
  - presenting a display of odds for a race, wherein the display shows odds for less than all of the runners in the race at any point in time; and
  - rotating over time the odds shown in the display so that all of the runners in the race are displayed over a window of time.
2. (withdrawn) A method for interactive wagering, comprising:
  - receiving a selection of a multi-race wager from a user;
  - displaying horse selections for multiple races based on the multi-race wager; and
  - receiving selections of horses for the multi-race wager in an order selected by the user.
3. (withdrawn) A method for interactive wagering, comprising:
  - receiving from a user selections of multiple players in an interactive wagering system;
  - enabling the user to toggle an authorization status of each player such that each player is authorized or unauthorized;

enabling the user to toggle each player on or off if the player is authorized; and

preventing a player from subsequently appearing in a list of potential players if that player is unauthorized or off.

4. (currently amended) A method of providing a user interface for interactive wagering, comprising:

~~providing a user with an opportunity to create a default wager, wherein the default wager includes at least one default setting~~ receiving an indication from a user of a wagering preference;

storing the wagering preference;

using the stored wagering preference as a default selection in subsequent wagers ~~displaying default selections for a new wager based on the default wager, wherein the new wager requires selection of~~ subsequent wagers are associated with at least a track selection, a race selection, a bet type selection, a bet amount selection, and a horse selection; and

providing the user with an opportunity to change the default selections selection for the new wager at least one of the subsequent wagers from at least one of the default selections selection to another selection; and

~~providing the user with an opportunity to place the new wager.~~

5. (withdrawn -- currently amended) The method of claim 4, wherein the ~~at least one default setting of the default wager~~ selection is a track selection.

6. (withdrawn -- currently amended) The method of claim 4, wherein the ~~at least one default setting of the default~~ wager selection is a bet type selection.

7. (withdrawn -- currently amended) The method of claim 4, wherein the ~~at least one default setting of the default~~ wager selection is a bet amount selection.

8. (currently amended) The method of claim 4, wherein the ~~at least one default setting of the default~~ wager selection is a previously selected track.

9. (canceled)

10. (canceled)

11. (withdrawn) A system for presenting a wagering interface for interactive wagering comprising:

control circuitry that presents a display of odds for a race, wherein the display shows odds for less than all of the runners in the race at any point in time, and rotates over time the odds shown in the display so that all of the runners in the race are displayed over a window of time.

12. (withdrawn) A system for interactive wagering, comprising:

a user input device that accepts user inputs; and  
control circuitry that receives a selection of a multi-race wager as one of the user inputs, that displays horse selections for multiple races based on the multi-race wager, and that receives selections of horses for the multi-race wager in any order desired by the user.

13. (withdrawn) A system for interactive wagering, comprising:

a user input device that accepts user inputs; and  
control circuitry that receives selections of multiple players in an interactive wagering system as some of the user inputs, that enables the user to toggle an authorization status of each player such that each player is authorized or unauthorized, that enables the user to toggle each player on or off if the player is authorized, and that prevents a player from subsequently appearing in a list of potential players if that player is unauthorized or off.

14. (currently amended) A system of providing a user interface for interactive wagering, comprising:

a user input device that accepts user inputs; and  
control circuitry that receives an indication from a user of a wagering preference ~~provides a user with an opportunity to create a default wager as one of the user inputs, wherein the default wager includes at least one default setting,~~ that stores the wagering preference, that uses the stored wagering preference as a ~~displays default selections~~ selection in subsequent wagers ~~for a new wager based on the default wager, wherein the new wager~~ subsequent wagers ~~requires selection of~~ are associated with at least a track selection, a race selection, a bet type selection, a bet amount selection, and a horse selection, and that provides the user with an opportunity to change the default selection ~~selections~~ for the new wager at least one of the subsequent wagers ~~from at least one of the default selections~~ selection to another selection, ~~and that provides the user with an opportunity to place the new wager.~~

15. (withdrawn -- currently amended) The system of claim 14, wherein the ~~at least one default setting of the default wager~~ selection is a track selection.

16. (withdrawn -- currently amended) The system of claim 14, wherein the ~~at least one default setting of the default wager~~ selection is a bet type selection.

17. (withdrawn -- currently amended) The system of claim 14, wherein the ~~at least one default setting of the default wager~~ selection is a bet amount selection.

18. (currently amended) The system of claim 14, wherein the ~~at least one default setting of the default wager~~ selection is a previously selected track.
